[Read Customer Reviews](#)

Design based off scientific studies into the sensory development of babies - Auditory, tactile, hand-eye co-ordination & facial recognition  
Hand-eye co-ordination & fine motor skills - smiling bugs encourage baby to reach and interact with hands and feet  
Auditory stimulation - Rattles inside each bug make gentle rattle sounds  
Focus & attention - Bright and contrasting patterns  
Touch & tactile senses - Butterfly and Bumblebee wings have crinkly material inside Babies love Babychino, and so will you!
