[Read Customer Reviews](#)

Single Ergonomically designed copper knee Brace, with the best compression technology, can achieve comprehensive protection. Slow shock and decompression, disperse knee pressure, improve blood circulation, protect knee from injury.

Designed for everyday use and outdoor activities- It can help you recover faster, Help relieve arthritis knee pain. Enjoy the fun of sports! It is ideal for work that requires regular knee use, such as mountaineering, running, ball sports, cycling, and Gym exercise(including the elderly).

60% copper fiber cloth+32%Nylon+6%spandex+Rubber. High copper content .Help relieve swelling and muscle soreness; The copper Knee Sleeves adopts a new type of 3D weaving technology, and is easy to dry, air-permeable and sweat-absorbing.

NoN-SLIP Grip: After two hours of continuous exercise in the gym, the sleeves barely slipped. You will love the feeling of athletics with our knee sleeves. But please be sure to follow our size chart instead of your habits. Latex / rubber people allergic caution.

Worry-free shopping: 100% after-sales guarantee. Our copper knee compression sleeves are not fitted with a spring bracket. They are primarily based on compressive and copper fiber cloth to exert a constant pressure on the knee joint, providing muscle support during exercise and leisure activities. So its support is not as big as other knee supports. Also if you choose the wrong size, it will scroll down or have little support and compression. Please feel free to contact us to get the right size. You need a good knee sleeves to protect your knees.

Wearing copper knee brace can exert pressure on the knee and effectively prevent meniscus injury, ligament injury, and cartilage injury.

You will love the feeling of athletics with it.

How do I determine the size

PAY ATTENTION: Please check chart to select your size. We suggest you do not choose a size based on your height and weight. You need to determine the size based on the thigh circumference 5 inches above your kneecap. (This is the most accurate.)

step

Use a tape measure to measure the position of your thigh circumference and refer to the image on the right (about 5 inches above the knee). Use the data in "1" to get the corresponding size (S/M/L/XL/2XL/3XL) against the data in the lower or right image. Select it.

Please wash your JIUFENTIAN product regularly so that the compression of the knitted fabric can be retained.

JIUFENTIAN copper knee brace Product instructions

who may use our copper knee brace?

Basketball players, tennis players, baseball players and golfers, - don't worry about muscle cramps and fatigue when training. Outdoor sports enthusiasts and athletes - you can train in the gym and field for longer and perform better. People with knee problems - prevent and alleviate muscle and knee pain

-warning-

There are rubber anti-slip strips on the top of the sleeves, People who are allergic to latex/gel/rubber are prohibited. Pregnant women, hemorrhagic tendency, malignant tumor, high fever, skin injury, severe hypertension are prohibited .Should you notice any unusual changes (e.g.increased symptoms), stop using it immediately This product is not a therapeutic medical product

Washing instructions

Hand washing and natural air drying, do not use washing machines, it will destroy the structure and compression of knitted fabric. Since it is made of knitted fabric, be careful not to get hooked on the knee sleeve thread by other things, this will destroy it.

Use time

For compression knee sleeves, please do not wear them continuously for a long time.

It is recommended to rest for 20 minutes every 3 -4 hours.

For joint injuries, you can use it when you using your knees and take off when you take a break.

Everyone's knees may have different conditions, You can also ask your doctor for better advice You can put it on during exercise to prevent knee injuries and take it off after exercise.
