PROVEN TO WORK: Join over 1.2 million people who are successfully learning Arabic with Rocket Arabic. Use our Arabic learning app (iOS and Android) and get started now! Love your language-learning journey

Our story

How we got our start?

Rocket Languages was founded in 2004 by 2 friends who saw that the methods of the time weren't useful for learning a new language. We researched the factors holding people back, talked to polyglots, hired linguistic experts, and came up with Rocket Spanish. Now we have expanded to 12 languages.

What makes our product unique?

Our online courses give you everything you need to learn a language from home. You will get conversational straight away by learning the most useful things first and then master your new language with the most comprehensive online courses there are.

Why we love what we do?

At Rocket Languages our philosophy is to create the most effective online language learning courses possible. This means, for example, that we are constantly researching new learning methods and incorporating those methods into our courses. And course updates are free to all users! Review 2021, feedback 2021, promo code, discount code 2021, buy, picture, description, sale, price comparison, cheap, cheapest, value for money.
