

# RK ROYAL KLUDGE RK61 Wired 60% Mechanical Gaming Keyboard RGB Backlit Ultra-Compact Brown Switch White Review-2021

[Read Customer Reviews](#)

**Mini 60% Keyboard:** RK61 mini 60% gaming keyboard is a ultra-compact layout with 61 keys makes you a neat desktop with your organized gears on, even folks have nothing to do with Minimalist will dive into its tiny practical design. Tips you might want to know is that keyboard without numpad is most FPS gamers' choice, more spaces left for mouse movements.

**Brown Switch:** Slightly quieter and easier to trigger than the Blue Switch. Halfway between a typing and a gaming switch. Some people prefer Brown Switch since it enables you to double tap faster and typists like them because they still have a good tactile feedback, but the audio feedback isn't quite as noticeable as Blue Switch.

**RK61 RGB Keyboard:** This 60% rgb keyboad has 18 RGB backlight modes, 8 monochrome backlight modes and 1 full color backlight. These modes will give you more enjoyable when you gaming or typing at night.

**Ergonomic Mechanical Keyboard:** RK ROYAL KLUDGE RK61 is a mechanical keyboard with the scientific stair-up keycap design brings maximum comfort, keeping your hand in a most natural state to minimize hand fatigue after longtime use and help you minimize typos. So it's designed for gamer, office worker, copywriter, programmer, typing teacher and editors.

**Keyboard Compatibility & Reliable Service :** This RK61 USB wired mechanical gaming keyboard compatible with Windows / MacOS / Android. Pls feel free to contact us when you meet any problem, RK ROYAL KLUDGE will spare no effort to provide the best service to every customer within 24 hours to help you. This is RK ROYAL KLUDGE OFFICIAL STORE ! RK ROYAL KLUDGE RK61 RGB Mechanical Keyboard BORN FOR GAMING !

RK ROYAL KLUDGE RK61 is an RGB Mechanical Keyboard with 61 keys. It has various application designs, such as two-color key caps, All keys without conflict, brilliant color backlit, control of hardware backlit, make your own key function and FN multi-function key combination. The most incredible is you can use the programmer to DEFINE your own keyboard.

**Blue Switch:** Excellent tactile feedback, every time you press any key, you can clearly get the feedback of the click, and with a clear clicky sound, perfect for playing games and typing. These tactile keyswitches help ensure accurate data entry.

**Brown Switch:** Slightly quieter and easier to trigger than the Blue Switch. Halfway between a typing and a gaming switch. Some people prefer Brown Switch since it enables you to double tap faster and typists like them because they still have a good tactile feedback, but the audio feedback isn't quite as noticeable as Blue Switch.

**Red Switch:** Linear Switch, meaning that the force at the beginning and the end of each stroke is nearly identical. The result is a feel that most perceive as "smoother" and "faster" making them especially popular among gaming enthusiasts. Red Switch is the best fit switch using in Office.

**FAQ:**

1) Our keyboard can't compatible with PS4 and Xbox

Our keyboards can't compatible with game of PS4 and Xbox on wired mode, due to uncertainty, we do not recommend users who use PS4 or Xbox to purchase our products.

2) Our keyboard is wired version, so there is no off/on switch behind it, and it doesn't support Bluetooth.

Any other problems, please don't hesitate to contact our after-sales support through Amazon message function, we will assist you to solve all problems you had met with our product.
